

WYPALL* Microfiber Cloths

Created for Cleaning Professionals

Designed with the cleaning professional in mind helping you to clean smarter. Environmentally friendly cleaning option that can be used without chemicals.

- The WYPALL* Microfiber cleaning cloths can be washed up to 300 times, without affecting performance, creating a cost effective choice for busy cleaning professionals
- Helps improve cleaning efficiency by lifting and trapping dirt from surfaces
- No need for cleaning chemicals, which helps reduce cleaning costs and is environmentally friendly.
- Can be used for dry or wet cleaning applications with good liquid absorbency, holding upto 8 times its weight in liquid
- The smooth texture of the green WYPALL* Microfiber cloth is ideal for glass and mirror cleaning with low streaking on high shine surfaces
- Four colour variants for easy task segregation helping to minimise risk of contamination.

WYPALL* Microfiber cloths have been developed with thinner fibres and more fibers per cloth, offering better absorbency and drape.

How do Microfiber Cloths work?

Microfiber material is made by splitting fibres into tiny pieces and knitting them together into a cleaning cloth that effectively traps soil and absorbs liquid for a low streak shine.

Ideal for:

- Desk and surface cleaning
- Glass and mirror cleaning
- Reducing the risk of contamination
